

Product Announcement: New Reflective Beam Smoke Detector

February 2019

Honeywell Silent Knight is pleased to announce the next evolution in beam smoke detection with the availability of the OSI-RI-SK, a new addressable single-ended, reflective beam smoke detector. This new offering directly replaces the SK-BEAM and SK-BEAM-T.

The new OSI-RI-SK works with many of the same accessories as the legacy SK-BEAM and SK-BEAM-T including the reflector, test switch stations and mounting kits, while offering the following advanced new features:

- LED guided alignment speeds installation and ensures reliability by accurately aligning to the reflector
- High false alarm resistance to building movement, solid object intrusion and light sources
- Long range coverage from 16-328 feet is standard (no separate kit required)
- Remote test station capable and built-in imager heater are standard
- Automatic sensitivity threshold setting saves time during installation
- Loop-powered

Contact your preferred Honeywell authorized security equipment distributor for ordering and pricing information and visit silentknight.com for more information.

New Model No.	Replaces	Description
OSI-RI-SK	SK-BEAM and SK-BEAM-T	Addressable Beam Detector with Reflector
OSP-004	N/A	OSI-R Test Filters (10 Pack)

Note that the legacy SK-BEAM and SK-BEAM-T will continue to be offered through April 30, 2019 and after that date will only be available while supplies last.

We appreciate your business and continued support of Honeywell Silent Knight products.
